

ACNFP Committee Advice Documents by year

Committee Advice documents summarise the advice the Committee has provided for the GM and novel foods regulated products applications where their advice was sought. They outline the areas they were asked to advise on and the conclusions reached, based on the evidence presented. These are used by the Food Standards Agency (FSA) and Food Standards Scotland (FSS) to inform the development of Safety Assessments which addresses the requirement in the legislation for an Opinion.

The completed Committee Advice Documents are organised by year, click on link to access the years.
