

# Committee Advice Documents

Committee Advice documents summarise the advice the Committee has provided for the GM and novel foods regulated products applications where their advice was sought. They outline the areas they were asked to advise on and the conclusions reached, based on the evidence presented. These are used by the Food Standards Agency (FSA) and Food Standards Scotland (FSS) to inform the development of Safety Assessments which addresses the requirement in the legislation for an Opinion.

The completed Committee Advice Documents can be found below:

## **Barley Rice Protein - RP19**

This Committee Advice Document outlines the conclusions reached on the areas of the regulated product assessment where the Committee were asked to review. These are used to inform the FSA/FSS Safety Assessment for the application.
